

# The Co-operative University of Kenya

**END OF SEMESTER EXAMINATION DECEMBER-2016**

**EXAMINATION FOR THE DEGREE OF BACHELOR OF CO-OPERATIVE  
BUSINESS / BACHELOR OF COMMERCE  
(BCOB YR IVSEM II / BCOM IV SEM II)**

**UNIT CODE: HBF 2403/ HCOB 2411**

**UNIT TITLE: FINANCIAL MODELLING AND FORECASTING/ FINANCIAL  
MODELLING**

**DATE: 16<sup>TH</sup> DECEMBER, 2016**

**TIME: 2:00 PM – 4:00 PM**

## **INSTRUCTIONS:**

- Answer question **ONE (compulsory)** and any other **TWO** questions

## **QUESTION ONE**

- (a) Differentiate between the qualitative and quantitative as used in forecasting. (4 Marks)
- (b) Outline the steps in forecasting using decomposition of time series. (4 Marks)
- (c) You are provided with the following data.

| <b>Month</b>       | <b>Jan</b> | <b>Feb</b> | <b>March</b> | <b>April</b> | <b>May</b> | <b>June</b> | <b>July</b> | <b>Aug</b> | <b>September</b> |
|--------------------|------------|------------|--------------|--------------|------------|-------------|-------------|------------|------------------|
| <b>Sales '000'</b> | 450        | 440        | 460          | 410          | 380        | 400         | 370         | 360        | 410              |

Required;

- i) Conduct a three month weighted moving average. (4 Marks)
- ii) Forecast the sales for the month of October. (2 Marks)
- iii) Discuss the limitations of moving averages as a method of financial forecasting. (3 Marks)
- (d) Outline three objectives of financial forecasting. (3 Marks)
- (e) Highlight the assumptions of Markov analysis. (3 Marks)
- (f) Twelve administrative trainees in a company took an aptitude test in two parts, one designed to test ability to do appropriate calculations and the other designed to test skill in interpreting results. Their scores were as follows:

| <b>Trainee</b>              | <b>A</b> | <b>B</b> | <b>C</b> | <b>D</b> | <b>E</b> | <b>F</b> | <b>G</b> | <b>H</b> | <b>J</b> | <b>K</b> | <b>L</b> | <b>M</b> |
|-----------------------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|----------|----------|----------|
| <b>Calculation Score</b>    | 23       | 56       | 74       | 29       | 82       | 45       | 36       | 51       | 60       | 55       | 52       | 88       |
| <b>Interpretation Score</b> | 16       | 38       | 65       | 39       | 32       | 51       | 11       | 19       | 47       | 54       | 43       | 50       |

Required:

- i) Obtain the interpretation on calculation regression line, using the method of least squares. (6 Marks)
- ii) Trainee N obtained 72 in the calculation but was absent for interpretation test. Use the regression line to estimate trainee N's interpretation score. (4 Marks)

## **QUESTION TWO**

- (a) The monthly electricity bill at the Fidelity Ltd over the past 12 months has been as follows:

| <b>Month</b> | <b>Amount (sh.)</b> |
|--------------|---------------------|
| December     | 30,660              |
| January      | 27,190              |
| February     | 30,570              |

|           |        |
|-----------|--------|
| March     | 30,640 |
| April     | 29,730 |
| May       | 31,530 |
| June      | 29,720 |
| July      | 33,070 |
| August    | 30,010 |
| September | 27,550 |
| October   | 30,130 |
| November  | 27,940 |

Mr. Paul the accountant, is considering using exponential index Smoothing with  $\alpha = 0.5$  to forecast future electricity sales.

Required:

Determine next December's Forecast. (10 Marks)

(b) State and explain any FIVE applications and uses of Financial modeling. (10 Marks)

### QUESTION THREE

The management of Kiboko Ltd. Want to establish the amount of Financial needs for the next two years. The balance sheet of the firm as at 31 December 2001 is as follows:

|                     | Sh. '000'      |
|---------------------|----------------|
| Net fixed assets    | 124,800        |
| Stock               | 38,400         |
| Debtors             | 28,800         |
| Cash                | 7,200          |
| <b>Total assets</b> | <b>199,200</b> |

Financed by:

|                        |        |
|------------------------|--------|
| Ordinary share capital | 84,000 |
| Retained earnings      | 35,200 |
| 12% long-term debt     | 20,000 |
| Trade creditors        | 36,000 |
| Accrued expenses       | 24,000 |

**199,200**

Additional Information;

- For the year ended 31 December 2001, sales amounted to sh. 240,000,000. The firm projects that the sales will increase by 15% in year 2002 and 20% in year 2003.
- The after tax profit on sales has been 11% but the management is pessimistic about future operating costs and intends to use an after-tax profit on sales rate of 8% per annum.
- The firm intends to maintain its dividend payout ratio of 8%. Assets are expected to vary directly with sales while trade creditors and accrued expenses form the spontaneous sources of financing.
- Any external financing will be effected through the use of commercial paper.

**Required**

(a) Determine the amount of external financial requirements for the next two years.

(10 Marks)

(b)

i. A proforma balance sheet as at 31 December 2003. (7 Marks)

ii. State the fundamental assumption made in your computations in (a) and b (i) above.

(3 Marks)

#### QUESTION FOUR

(a) The following data relates to Maendeleo Company limited in relations to sales and cost of advertisement for the year ended 30<sup>th</sup> June 2010.

| Sales (y) sh '000' | Cost (x) sh. '000' |
|--------------------|--------------------|
| 170                | 20                 |
| 240                | 40                 |
| 260                | 50                 |
| 300                | 60                 |
| 220                | 30                 |
| 250                | 40                 |

Required:

- Compute the relationship between sales and cost of advertisement. (4 Marks)
- Forecast for sales if sh. 50,000 is spent on advertisement. (2 Marks)
- What would be the forecast sales if advertisement cost is sh. 100,000 (2 Marks)

(b) Maxwell traders Ltd is a trading company. The following amounts were extracted from the books of account on 31<sup>st</sup> December 2014.

#### TRIAL BALANCE AS AT 31.12.2014

|                                    |                  |                  |
|------------------------------------|------------------|------------------|
| Shs 100 ordinary share capital     |                  | 500,000          |
| Land & Buildings                   | 400,000          |                  |
| Motor vehicles                     | 125,000          |                  |
| Equipment                          | 85,000           |                  |
| Furniture & fittings               | 75,000           |                  |
| Stock                              | 19,500           |                  |
| Purchases and Sales                | 570,000          | 670,000          |
| Debtors & Creditors                | 120,000          | 148,000          |
| Long term loan                     |                  | 50,000           |
| Bank                               |                  | 4,400            |
| Returns                            | 6,000            | 7,600            |
| Carriage                           | 650              | 1,200            |
| Depreciation Land & Buildings      |                  | 70,000           |
| Motor vehicle                      |                  | 30,000           |
| Equipment                          |                  | 10,000           |
| Provision for bad & doubtful debts |                  | 3,000            |
| Wages and salaries                 | 34,750           |                  |
| Rates                              | 19,000           |                  |
| Insurance                          | 6,500            |                  |
| Telephone & Postage                | 4,600            |                  |
| Discount                           |                  | 2,500            |
| Loan interest                      | 4,500            |                  |
| Motor vehicles expenses            | 23,300           |                  |
|                                    | <b>1,495,500</b> | <b>1,495,500</b> |

Additional Information:

- Stock at 31.12.2014 was physically established at sh 28,500
- Wages and salaries of sh. 2,900 were outstanding at 31.12.2014
- Rates were paid for 19 months running through to 30.09.2015
- Provision for doubtful debts is to be provided for at 3% of the year end debtors
- The bank balance attracts banking service charges at sh 850 per month. This charge is yet to be taken into account.
- The amount for sales includes sh. 10,000 received from a customer whose delivery will be made in February 2015.
- The Company rents a section of the premises and expects to receive rent at year end amounting to sh 12,000.

8. Corporation tax is paid at 10% of profits while the company's shares are currently trading at sh 15 each.
9. Ordinary share dividend of 10% of ordinary stock is proposed.
10. Depreciation is to be charged on yearend balance at:
  - Motor vehicle 20% reducing balance method
  - Land and buildings 5% straight line method
  - Equipment 10% straight line method.

Required:

Advice the company on the chances of corporate failure for the coming one year based on the Atman's Z-score Model. (12 Marks)

### QUESTION FIVE

- (a) Outline any FIVE Quantitative Methods used in financial Models. (5 Marks)
- (b) Sam and Obama have set up a business named Sama Enterprises as partners. The firm will venture in the purchase and sale of toy cars with effect from 1 July 2010 with opening cash balance of sh. 2,000,000

The projected sales for the first months and thereafter are as follows:

| Month                          | Projected sales (Units) |
|--------------------------------|-------------------------|
| July                           | 2,400                   |
| August                         | 3,600                   |
| September                      | 4,800                   |
| October and monthly thereafter | 9,600                   |

Additional information:

1. The selling price per toy car would be sh. 800
2. All sales would be on credit terms, requiring settlement two months after the date of sale. However, if settlement was made by customers within one month of sale, a 2.5% cash discount would be given.
3. Of the total sales, 60% are expected to be settled two months after the date of sale and 40% (before any discount is deducted) are expected to be settled one month after the date of sale.
4. The purchase cost of each toy car is sh. 490. The firm intends to make purchases at the end of each month in order to maintain sufficient inventory for sale in the following month.
5. Payment for purchases would be made one month in arrears.
6. Non-current assets are expected to cost sh. 1,750,000 payable on 1 July 2010.
7. Annual rent is expected to be sh. 1,680,000 and be payable quarterly in advance commencing 1 July 2010.
8. Monthly wages are expected to be sh. 280,000 payable in the month they would be incurred.
9. Other monthly overheads are expected to be sh. 420,000 half of which will be payable in the month they are incurred and the balance one month later.

**Required:**

A monthly cash budget for Sama Enterprises for the months of July, August, September, October and November 2010. Your cash budget should indicate the expected net cash flow for the month and the cumulative budgeted cash surplus or deficit at the end of each month. (15 Marks)
